

Going Green

with CA General & AMP!

As part of the AMP product offering, there have been some eco-friendly initiatives introduced that we at CA General Insurance Services can now offer new and existing clients, including:

New home and contents insurance features

When rebuilding or replacing items covered by your home and contents insurance a number of new eco-friendly features have been introduced to help reduce the impact of the environment.

Rainwater storage solution or power facility

The insurer will pay up to \$2,500 of the net cost of installing rainwater storage solution or solar powered heating facility when you rebuild or repair your home when at least 80% of your home is damaged by an insured event. If these were part of your home before your claim, they will be covered elsewhere in your policy.

3 star energy rating for white goods

New for old replacement now includes a minimum 3 star energy rating on white goods, even if your white goods originally had a lower rating. This means the insurer will replace fridges, freezers, washing machines, dryers, dishwashers and air conditioners, with a new item of equal specification and, if you agree, with a minimum 3 star energy rating.

Motor insurance for hybrid vehicles

For an AMP motor vehicle comprehensive policy, insurance premiums are reduced by 10% for hybrid vehicles. Any discounts that you may be eligible for such as no claim discounts, multiple policy discounts, family discount, named driver option for example, will be applied to the new reduced premium.

If you are an existing customer who has a hybrid vehicle comprehensively insured with AMP, the premium reduction will automatically take effect upon renewal.

^ Hybrid vehicles are those that are powered by electricity and one or more other fuel types. Examples of hybrid vehicles include Toyota Prius, Lexus 450 GSH, Lexus RX 400H and Honda Civic.
